

**Jordan University of Science and Technology**  
**Faculty of Engineering**  
**Industrial Engineering Department**

IE434 Control And Automation Lab

Summer Semester 2019-2020

**Course Catalog**

1 Credit Hours. PLC programming basics using ladder logic, Microcontroller programming using C, Servo motor control and performance response curves. Process Control and acquiring physical data from various sensors. On/Off control and PID Control basics. Basics of Robotics.

**Text Book**

|                          |                           |
|--------------------------|---------------------------|
| <b>Title</b>             | Handouts and lab material |
| <b>Author(s)</b>         | Tarek Al-Hawari           |
| <b>Edition</b>           | 1st Edition               |
| <b>Short Name</b>        | ref 1                     |
| <b>Other Information</b> |                           |

**Instructor**

|                 |                            |
|-----------------|----------------------------|
| Name            | <b>Mrs. EBTEHAL YOUNIS</b> |
| Office Location | M6 L-0                     |
| Office Hours    |                            |
| Email           | emyounis@just.edu.jo       |

**Class Schedule & Room**

Section 1:  
 Lecture Time: Sat, Thu : 14:30 - 17:30  
 Room: LAB

| Prerequisites |                              |                      |
|---------------|------------------------------|----------------------|
| Line Number   | Course Name                  | Prerequisite Type    |
| 294330        | IE433 Control And Automation | Prerequisite / Study |

| Tentative List of Topics Covered     |   |            |
|--------------------------------------|---|------------|
| Weeks                                | Topic   | References |
| Weeks 1, 2, 3, 4, 5, 6, 7, 9, 10, 11 | 1- Experiment 1, Basics of ladder logic on Siemens PLC S7 200 2-Experiment 2, Basics of ladder logic on Siemens PLC S7 200 3- Experiment 3 Basics of ladder logic on Siemens PLC S7 300 (distribution station ) 4- Experiment 4 Basics of ladder logic on Siemens PLC S7 300 (sorting station) 5- Experiment 5, Basics of ladder logic (analog inputs/ analog outputs) 6- Experiment 6, Introduction to process trainer components (sensors and actuators) 7- Midterm exam 8- Experiment 7 ,On/Off Control (Temperature and level). 9- Experiment 8, PID Feedback Control (level and pressure). 10- Experiment 9 , Basics of Lego robot control 11- Experiment 10, Microcontroller basics (arduino) |            |

| Mapping of Course Outcomes to Program Student Outcomes  | Course Outcome Weight (Out of 100%) | Assessment method |
|---|-------------------------------------|-------------------|
| Design, develop, and conduct engineering experiments and analyze outcome data. [1SLO3, 1SLO6] | 70%                                 |                   |
| Apply learned techniques, tools, and skills to solve engineering problems. [1SLO1]            | 30%                                 |                   |

| Relationship to Program Student Outcomes (Out of 100%) |      |      |      |      |      |      |
|--|------|------|------|------|------|------|
| SLO1   | SLO2 | SLO3 | SLO4 | SLO5 | SLO6 | SLO7 |
| 30   |      | 35   |      |      | 35   |      |

| Evaluation      |        |
|-----------------|--------|
| Assessment Tool | Weight |
| Midterm         | 30%    |
| quizzes         | 30%    |
| final           | 40%    |

| Policy        |   |
|---------------|---|
| course policy | 11 Experiments are conducted with quizzes made for each one for a total of 30%. A midterm exam is done which worth 30% and a final exam worth 40% |
