**Faculty of Nursing**  
**Nursing Department**

NUR762 Advanced Community Health Nursing (1) Clinical I

Second Semester 2025-2026

**Course Catalog**

2 Credit Hours. This course will provide the students with an opportunity to develop specific nursing skills and competencies related to assessment, monitoring, and diagnoses of the health status of individuals, families, aggregates, and communities. In this course, you will work in teams to prepare elements of a community needs assessment for selected community in Jordan. You will learn to use secondary data (e.g. census and other administrative data) to examine your chosen community's health status. Additionally, you will collect primary data (e.g. surveys, interviews, focus groups) by conducting research with community leaders, community-based organizations, health providers, and community residents. You will work with engaged stakeholders to interpret and prioritize assessment findings to suggest possible interventions. Students will also be responsible for presenting an Evidence-Based Nursing Journal Club meetings on a topic related to community health issues.

**Teaching Method:** On Campus

**Class Schedule & Room**

Section 2:  
 Lecture Time: Wed : 09:00 - 16:00  
 Room: HOSPITAL (NUR)

	<b>Course Outcome Weight (Out of 100%)</b>	<b>Assessment method</b>
<b>Mapping of Course Outcomes to Program Outcomes</b>		
1.Synthesize and develop effective means of presenting multiple sources of data that describe a community's health resources, health-related problems, and recommendations for action	15%	
Develop partnerships with community leaders, community-based organizations, health providers, and community residents	15%	
Integrate theoretical perspectives from nursing science and related sciences to analyze assessment data acquired from a target population for identifying a client system primary prevention.	15%	

Apply methods of conducting qualitative research techniques (such as structured and semi-structured questionnaires, group interviews, and field observations) to ascertain community perceptions of health needs	15%	
Become familiar with the services offered by a health care agency and the target population served through observation of service providers, attendance at relevant meetings, interviews with agency staff and leadership and participation as appropriate in the assessment and delivery of services.	20%	
Conduct structured critical appraisal to evidence, and to recognize the limitations of the application of evidence in clinical practice.	20%
