Evaluation	
Assessment Tool	Weight
First Exam-Clinical	15%
Second Exam- clinical requirements	25%
Professionalism/Clinical Skills	10%
Final Exam	50%

Policy	
RESPONSIBILITY	<p>1. Students must develop a concept of RESPONSIBILITY for the total care of the patient. Students will also be responsible for arranging for future care of patients once a course of treatment has been completed. This will entail making arrangements for recall visits after a suitable time interval.</p> <p>2. Students must understand that dismissing a patient from the clinic without having the work checked by a member of staff will be regarded as a serious disciplinary offence.</p> <p>3. Cross-infection control must be the forefront of the students' minds whenever they are treating patients in whatever clinic they happen to be. This includes wearing a clean white coat, patients will not be examined by students before putting on gloves & mask. Personal hygiene is of prime importance.</p> <p>Courtesy and consideration for patients and people, with whom you work, form the basis of a successful practice.</p>
