Dental Technology Department

TDEN431 Applied Fixed Prosthodontics (1)

First Semester 2021-2022

Course Catalog

5 Credit Hours. This course is designed for the students studying Bachelor of Dental Technology in their fourth year of study and it is five practical credit hours. It's a practical course where the students apply design solutions to restore form and function in the oral cavity, gain more training and experience by constructing fixed prostheses. To enhance the learning opportunity, the students work in an integrated real lifework environment, hospitals and medical centres, and are encouraged to apply their previous theoretical and pre-laboratory knowledge to fabricate all different fixed prostheses types. This helps prepare the students beyond graduation.

Text Book

Title	Dental laboratory Procedure for Fixed Prosthodontics
Author(s)	John E. Rhoads, Kenneth D. Rudd, Robert M. Morro
Edition	2nd Edition
Short Name	Reference 1
Other Information	Publisher: Mosby
