

## Assessment using Mouse Mischief

### Context:

Mouse Mischief is a technology that enables social learning activities and quick in class assessment. It enables multiple people to share a single PC using multiple mice. Mouse Mischief enables teachers to create content in PowerPoint that can be accessed by a large group of students. Mouse Mischief can help increase student engagement, develop teamwork skills, and empower teachers to create novel instructional activities.

### Innovation summary:

Increased student engagement with learning, teamwork and cooperative learning skills developed, opportunity to provide instant feedback for students.

### Tools used:

Microsoft PowerPoint, Mouse Mischief 'plug -in', 1 PC, 1 projector, several USB mice.

### Leading questions for reflection:

1. Why is instant feedback useful for the learning process?
2. How could Mouse Mischief be used in your subject?
3. What other forms of instant feedback could you use?
4. How can formative assessment add value to summative assessment?
