

C.V.

Ali Al-Ali, MD

GENERAL INFORMATION

- Full Name: Ali Mohammad Nahar Al-Ali
- Nationality: Jordanian
- Marital status: Married
- Languages: Arabic (mother tongue), English (fluent)
- Date of birth: 11th of April 1987
- Place of birth: Irbid/Jordan
- Mobile: 0781161112
- ☐ E-mail: 1) amalali@just.edu.jo
- ☐ 2) ali.mohammedalali@nhs.net

ACADEMIC QUALIFICATIONS

- Recognition of the Jordanian Medical Council (JMC) in pain management (2022).
- Fellowship of the Faculty of pain medicine of the royal college of Anaesthetists, London, UK (FFPMRCA) 2021
- Jordanian Board in Anaesthesia and Intensive Care, April 2017
- Higher Medical Specialty of Medicine in Anaesthesia
- Master (M.Sc.) Degree, Faculty of Medicine/ Jordan University of Science and Technology (JUST), Irbid/Jordan, June 2016
- Bachelor's Degree of Medicine and Surgery (MBSS)/Faculty of Medicine, Jordan University of Science and Technology, June 2011.

WORK EXPERIENCE

2022 – present: Assistant Professor of anaesthesiology and pain management at the Faculty of Medicine at JUST/ consultant of anaesthesia and pain management at KAUH.

September 2019- Aug 2022: I finished a 3-year fellowship clinical training with part-time research as MTI Doctor/General pain and neuromodulation fellow at James Cook University Hospital (JCUH). The pain department at JCUH is one of the foremost national clinical centres for

neuromodulation in the UK and has a strong tradition of high-quality clinical practice and research. The unit treats >3,000 new patients each year and conducts overall 10,000 annual consultations.

I worked alongside five Consultants catering to most pain subspecialties, including neuromodulation, Headache and facial pain, paediatrics, Abdominal and pelvic pain, cancer pain, and spastic disorders, and the pain department team, and participated in the delivery of outpatient clinics as well as intervention and operating sessions. I have learned a broad range of pain management techniques and interventions from spinal injections and palliative injections to pain management programs alongside a solid grounding in pain assessment and general chronic pain patient management. I have had the opportunity to attend and participate in multidisciplinary team clinics for Neuromodulation that serve for patient selection, preoperative preparation, implantation, long-term care, and troubleshooting.

I was also part of the team contributing to chronic pain research within the department's existing research program.

March 2018-August 2019: Full-time teaching assistant and specialist in the Department of Anaesthesia and Intensive Care/ King Abdullah University Hospital (KAUH)/JUST. KAUH is the primary teaching hospital of Jordan University of Science and Technology (JUST). It is the biggest referral centre for Northern Jordan with a capacity of approximately 820 beds.

Active participant in various teaching sessions and departmental conferences for the anaesthesia residents.

Supervising and teaching the 5th year medical students during their anaesthesia rotation.

The Department of Anaesthesiology offers different services including Anaesthesia, Critical Care, and Pain Management. The Anaesthesia service covers 16 operating theatres for all aspects of surgical specialties including General Surgery, ENT, Ophthalmology, Dental and Maxillo-facial surgery, Gynaecological/Obstetrics, Paediatric surgery, Neurosurgery, Orthopaedics and Traumatology, Plastic surgery, Urology, Thoracic and Vascular surgery. The Critical Care service oversees a 12-bed Surgical Intensive Care Unit. Pain Management is an evolving service in the department. It includes an outpatient clinic and is in the process of establishing pain management policies and guidelines.

September 2016-February 2018: I worked as a Specialist in anaesthesia at Royal Hospital in Amman. I dealt with different types of surgeries such as Bariatric, Paediatric, Orthopaedics, Urologic, Gynaecological/Obstetrical, ENT, Plastic and General. I was involved in direct management of patients in the surgical ICU, which includes, but is not limited to, stabilizing and monitoring of trauma patients, managing patients after high-risk surgeries and early post-surgical complications, conducting anaesthesia and sedation for bedside procedures, managing ventilator settings, and weaning the patients from the ventilator.

July 2012-July 2016: residency program in Anaesthesia and Intensive Care in (KAUH) teaching hospital at Jordan University of Science and Technology. During the four-year program, I received training in all aspects of anaesthesia for the following surgical specialties:

- General Surgery
- ENT, Ophthalmology
- Dental and Maxillo-facial
- Gyn/Obstetrics and labour suite Analgesia
- Paediatrics
- Neurosurgery
- Orthopaedics and Traumatology
- Plastic and reconstructive
- Urology
- Thoracic and Vascular

My service extends outside the operating theatre to the cardiac catheterization lab, the magnetic resonance imaging suite, and the angiography and interventional radiology lab. During this residency program, I attained and maintained skills in dealing with airway problems, including awake fibro-optic intubation, and in securing vascular access, arterial catheters, central lines, and ultrasound-guided central line insertion, in addition to spinal anaesthesia and epidural anaesthesia and analgesia. As part of our residency program, there was daily Morning Report for the department and teaching sessions for anaesthesia residents.

I have been a member of the CPR team in the hospital.

July 2011-June 2012: Clinical Intern at Princess Basma Hospital/Ministry of Health, Irbid, Jordan.

A rotating internship through Internal Medicine, Paediatrics, Surgery and Obstetrics and Gynaecology rotations, with responsibilities including:

1. Managing patients in outpatient and inpatient settings, as well as a one-month Emergency Medicine rotation.
2. Attending various didactic lectures covering the most common clinical problems encountered.
3. Participating in various research projects conducted by the staff members.

COURSES & Meetings

- Clinical Methods of Research, 2014 - (JUST)
- Basic Life Support (BLS) Provider Course, 2018 – American Heart Association (AHA)
- Advanced Cardiovascular Life Support (ACLS), 2018 - (AHA)
- Paediatric Advanced Life Support (PALS), 2018 - (AHA)
- Annual Scientific Meeting for Neuromodulation Society of the UK& Ireland (NSUKI), Leeds, UK 2019

- NSUKI Hands-on Cadaver Workshop at University of Leeds, Leeds, UK 2019

Memberships and fellowships

- Fellowship of the Faculty of Pain Medicine of The Royal College of Anaesthetists (FFPMRCA)
- Membership of the General Medical Council (GMC), United Kingdom (UK).
- Recognition of the Jordanian Medical Council (JMC) in pain management.
- Member of The Jordanian Medical Association as a specialist in Anaesthesia and Intensive Care.
-
- Registered at the Jordanian Ministry of Health as a specialist in Anaesthesia and Intensive Care.
